

Mining Surveyors

Long term opportunities in the Australian resource sector

Our organisation has established a leading presence in the Australian Engineering, Railway, Mining and Construction industries.

Currently servicing the largest mining, infrastructure and construction companies in Australia, we are seeking three (3) motivated Mining Surveyors for various positions across Australia.

Requirements:

- Completed University / Technical College studies in Mining / Surveying.
- Must be competent in managing and delivering daily survey tasks related to coal mining projects.
- Effectively handle electronic datasets in both the field and office, and willing to quickly learn and use Maptek's **Vulcan** software.
- Machine Guidance experience would be of value.
- Must have good communicating, reporting/writing skills and be able to align their experience with our project standards and procedures.
- Experience using Leica or Trimble Total Stations.

The successful applicant would be confident in leading multiple survey crews. To excel in this role you will be a highly motivated, proactive individual with a pride and passion for your work and achievements. An enthusiastic coaching and positive 'can do' attitude is a must.

Application should include a cover letter and curriculum vitae.
